Herbs and Health
100% Natural

Green Tea (*Camellia sinensis*) is an excellent source of antioxidants that help promote a healthy immune system.*

This plant is carefully selected by Aboca adhering to the strictest protocols. Systematic quality controls implemented throughout the entire production process and analytical testing performed on raw material and finished product validate the safety and effectiveness of this herbal supplement.

Though epigallocatechin gallate is considered one of the main active ingredients of Green Tea, many other plant components contribute to the herb's efficacy. That is why Aboca has developed the exclusive W.P.C.

W.P.C. (Whole Phytocomplex Concentrate) is a combination of the freeze-dried extract with micronized powder from the same portion of the plant, to assure maximum bioavailability, optimum concentration of active principle and the full-spectrum of constituents.

The result is a product with uniform content of epigallocatechin gallate without the use of excipients, colorings, flavorings, or preservatives. GMO free.
